DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 7, 10-14, 17, 18 and 21-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al 7,085,798 (Kim).

Kim's Fig. 9 illustrates a plurality of selectors including a multiplexing network (the circuitry that feeds a pair of values to each of the sense amplifiers) with the selectors also including sense amplifiers (the sense amplifiers) and an arithmetic unit coupled to the sense amplifier (while an arithmetic unit is not shown as receiving the Sum output it is inherent for an adder to feed an arithmetic unit). Also note column 5, lines 14-39, and note the charging of nodes of the multiplexer network.

Allowable Subject Matter

3. Claims 5, 6, 8, 9, 15,16, 19, 20,29, and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
